

Handling / Loading Pallets of Bags - visual

Q-06

Extra attention must be paid when handling pallets of bags & bulk bags on pallets

Upon entering trailer, avoid rubbing on trailer walls. Rubbing against trailer walls will tear the bags

Place cardboard dunnage against freight ahead and against the wall of the trailer

Place pallet of bags or bulk bag on pallet into loaded position. Be careful not to damage any of the bags when positioning.

Finish by placing more cardboard around ALL sides & top of the pallet of bags or bulk bag on pallet. The pallet is now ready for other freight to be loaded around it. Do not leave this task for the “next person” to do.

These steps **MUST** be taken to prevent damage to Pallets of Bags & Bulk Bags on pallets.

Training Acknowledgment: I have been trained on the above process and understand what is expected.
